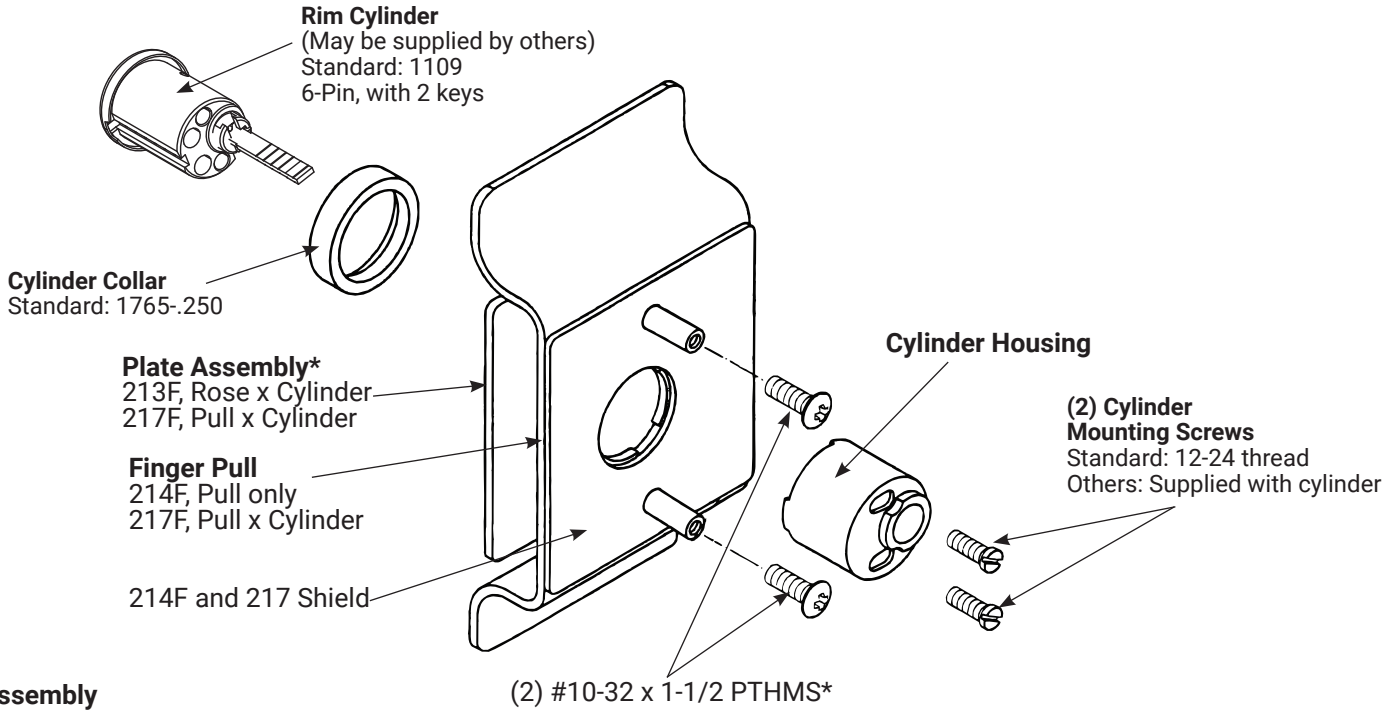
214F Trim: No preassembly required. Box should contain items marked *.

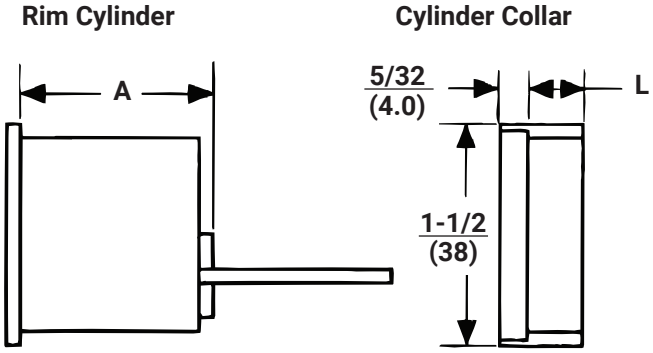
213F and 217F Trim: Assemble cylinder. Items marked * are used for installing trim to door.



Cylinder Assembly

1. Check cylinder components. See chart. Non-standard cylinder collars and mounting screws must be supplied with optional cylinders.
2. Assemble cylinder (note horizontal keyway). Insert Cylinder Housing prongs into Escutcheon matching notches. Pass Cylinder tailpiece thru Cylinder Collar and Cylinder Housing hole. Bolt Cylinder seated in Cylinder Collar recess (DO NOT OVERTIGHTEN SCREWS).
3. Check cylinder action. Cylinder key must freely rotate tailpiece when turned in either direction.

Cylinder Application



Cylinder Collar L = (Cylinder A - 1")

Cylinder Collar L = (Cylinder A - 25 mm)

ACCENTRA Cylinder	Cylinder Collar	Cylinder Mounting Screws
6-Pin: Fixed Core	1765.250 (STD.)	60-7000-1235-048 (STD.)

For other cylinder types, refer to 2100 series exit device catalog for collar information.

Trim

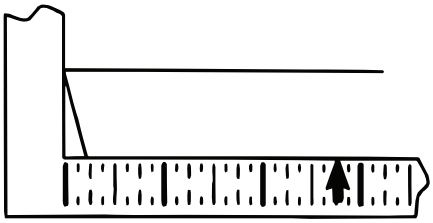
Installation Instructions

ACCENTRA

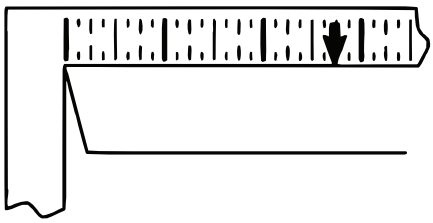
ASSA ABLOY

1. Check box contents. (See other side for box components and assembly instructions.)
2. Carry Vertical Reference Centerline to outside door face. Follow steps A and B, in image to the right.
3. Carry Horizontal Reference Centerline from inside to outside door face STD 161 Door Prep Acceptable.
4. Align trim template and tape to door, outside face. Non-Handed Trim - Installer preference for cylinder/key direction will determine position of 1/4" offset for cutout.

   ⚠ **Caution:** Office copiers and facsimile machines may change the size of a drawing and make the template inaccurate to use as a door marker. If this is not the original template packed with the trim, use only the dimensions written on the template to locate the holes on the door (do not use the template as a door marker).
5. Spot holes and prepare door for trim.
6. Mount trim to door. Fasten finger tight with 2 #10-32 x 1-1/2"PTH machine screws supplied (See Figure 1.)
   Note: If installing 214F dummy trim, continuie as shown in device instructions.
7. With trim in place, cut trim tailpiece as shown in Figure 2.
8. Seat device so that trim tailpiece penetrates cam slot, as shown in Figure 1. Continue as shown in device instructions.



A. Measure inside line location.



B. Carry dimension over to outside face

Trim for RHR or LHR door as packed.

Stock Doors:

Installation shows preparation for exit device trim. Stock door with ANSI/BHMA A156.115 preparation, for cylindrical lock with 2-3/4 (70) backset, may be used as substitute, when Trim is used with rim or SVR device.

Figure 1 **LHR Door Shown**

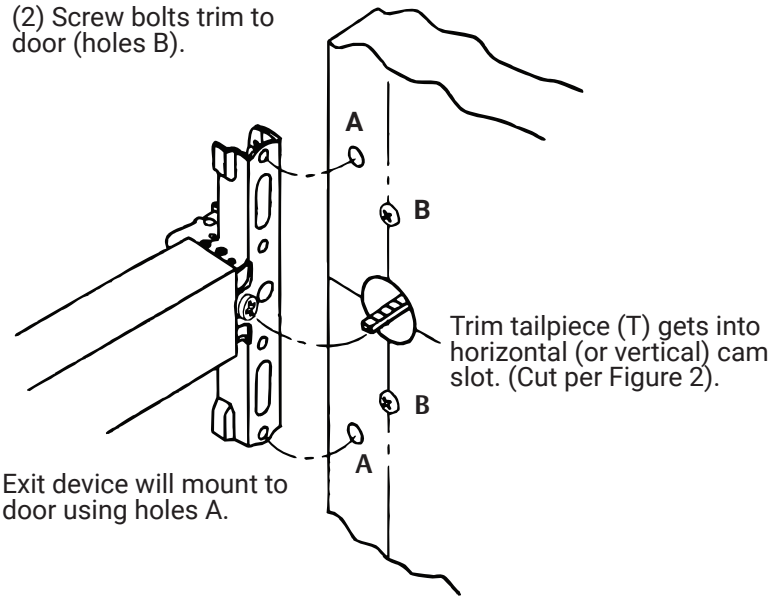


Figure 2

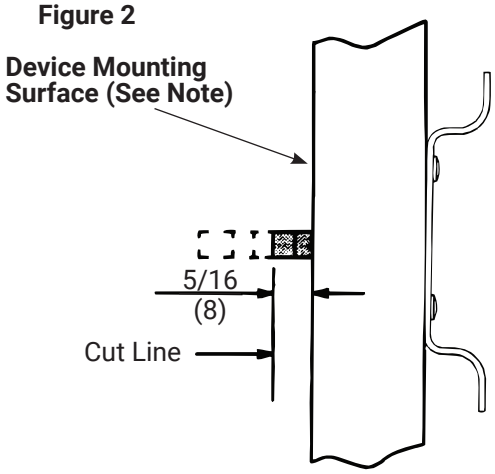

Note: Measure from device seat (door face - shown - or shim surface

Dimensions are in inches (mm).
