

Planet GDZ's US Automatic Door Bottoms boost Pemko Product Portfolio

The versatile solution in a small package

The Planet GDZ's US automatic door bottom features a narrow case which enables installation with face- or edge-mounted flush bolts. Since it requires minimal space within the door's thickness and does not intrude on the bottom rail, both the drop seal and the flush bolts can be used on the same door.

The narrow seal case also permits the use of two US automatic door bottoms in the same door to provide greater protection against wind, weather, and noise. In a traditional wood door, two mortise channels should be prepped for this installation.

The Planet US seal is made of high-grade, self-extinguishing silicone gasket with low maintenance requirements for years of sealing power. Easily adjust to the appropriate height to effectively seal gaps up to $\frac{3}{4}$ -inches. This door bottom can also seal against flooring that is sloped across the width of the opening.

Planet GDZ door seals are available through the Pemko products factory in Memphis, TN, to augment the Pemko automatic door bottoms product portfolio and bring a greater range of solutions to the United States and Canadian market. Planet GDZ, headquartered in Switzerland, is an ASSA ABLOY Group company which manufactures a variety of drop-down seals.

Features	Benefits
Narrow case	Smaller route in door enables use with flush bolts and flexibility to use two automatic door bottoms on the same door
High-grade silicone gasket	Long-lasting, reliable sealing
Meets UL10c	Fire rated

Applications:

- Hospitality
- Healthcare
- Schools
- Office Buildings
- Theaters
- Auditoriums
- Libraries

Door Hardware Solutions

ASSA ABLOY’s Architectural Door Accessories offer innovative door hardware products designed to provide a solution for challenging applications. The narrow Planet GDZ US automatic door bottoms can even be applied to a door with existing hardware, such as flush bolts or panic devices, to provide a desirable and better seal. These Planet door bottoms perfectly align with the Pemko product portfolio.
