Through-Bolt Sliding Hardware System

The Pemko Through-Bolt Sliding Hardware System is an ideal solution when your door is made of alternative materials, including metal, fiberglass, and aluminum. This system, which is also suitable for wood doors, features an auto centering apron that equally distributes the weight of the door while the through-bolts negate the need for a substantial top rail.

Applications

Through-Bolt sliding hardware is great for many locations. This includes Office Spaces, Sport Venues, Casinos, Hospitality, Retail, and Museums. By using this system on these doors, it creates a better flow and optimal use for patrons and employees

Office Spaces

COMPLETE THE LOOK

With ASSA ABLOY, it is easy to select coordinating hardware to complete your installation. Add visual appeal with Rockwood decorative door pulls or functionality with the Pemko seal sets for sliding doors. Visit pemko.com for more options and solutions.

ROCKWOOD DECORATIVE DOOR PULLS

Whether you are looking to achieve subtle charm, or make a bold statement for your opening, our large selection of Rockwood decorative pulls help to complete virtually any desired look. Our team can even help design and manufacture a custom solution from our factory in Rockwood, PA. The possibilities are endless!

PEMKO SLIDING DOOR PRIVACY SEALS

As the popularity of sliding doors continues to grow in hotels, offices and other markets, the need for concealment around the edge of the door has become a necessity. Pemko Sliding Door Seal Sets fill the gap between the door and wall providing the occupant with additional privacy, as well as light and draft control.

the good design studio
